Screed conveyors, plastering machines, fine concrete pumps

# Putzmeister – a name that stands for quality and innovation

Putzmeister Mörtelmaschinen GmbH offers one of the world's most comprehensive range of powerful machines for a wide variety of applications. Whether screed, self levelling floor screed, plaster, fine grained concrete or shotcrete – we offer a range of machines ideal for mixing and pumping.

## Technology with more value

We want to be more than just a technological leader. We want to be a reliable partner for our customers. We therefore offer you:

- A comprehensive network of competent sales partners
- Complete, comprehensible technical documentation
- Competent contact representatives to answer your questions
- Fast, uncomplicated order processing
- Short delivery times for machines, spare parts, and wear parts
- Fair pricing
- Certification according to DIN ISO 9001

	Model	Delivery rate	Maximum delivery range*	Material/Max. particle size
Semi-dry floor screed	Mixokret M 500/ M 700 o.Kompr. P. 10	4 m³/h	120 m horizontal 60 m vertical	16 mm
	Mixokret M 740 Stage V P. 12	3,8–5 m³/h	180 m horizontal 90 m vertical	16 mm
	Mixokret M 740 P. 14	3,8–5 m³/h	180 m horizontal 90 m vertical	16 mm
Self levelling floor screed	S 5 EF P. 22	90 l/min	60 m horizontal 40 m vertical	8 mm
	SP 11 THF P. 24	0–15 m³/h (0–250 l/min)	80 m horizontal 40 m vertical	8 mm
	SP 20 GHF P. 26	0–20 m³/h	200 m horizontal 60 m vertical	10 mm
	SP 25 DHF P. 28	0–20 m³/h	200 m horizontal 60 m vertical	10 mm
Plaster/Fine plaster	P 12 P. 30	6–12 l/min	30 m horizontal 15 m vertical	4 mm
	MP 25 P. 34	25 l/min	40 m horizontal 15 m vertical	4 mm

P 718 P. 62	4–17,4 m³/h	300 m horizontal 100 m vertical	32 mm
P 730 P. 64	3–30 m³/h	300 m horizontal 100 m vertical	32 mm

Legend

SM – Site mix (water, aggregate, binder)

PDM – Premixed dry mortar (bagged goods or combination from silo and flow-type mixer)

RMM – Ready mixed mortar (ready mix wet material from container or truck mixer)

Suitable for large construction sites

Suitable for small construction sites

**Note:** Always use a compatible mortar in combination with the machine technology. In you have any questions, please speak to the material manufacturer or contact us directly.

\* Depending on material and machine configuration.

Range of pumps – the right system for every application

Our machines are equipped with different pump systems that are tailored to the respective applications.

Compressed-air conveyors

Our conveyors operate according to the plug conveyance principle and are ideally suited to conventional screed applications. Some of the compressed air enters the pressure reservoir as header air and is mixed with the material to be conveyed, while the remainder enters the pressure line in order to separate the material into plugs and push them along the hose. e.g. M 500, M 700, M 740, M 760.

Worm pumps

The material flows steadily out of the hopper and into the auger assisted by the mixer shaft. The conveyor consists of a rotating steel shaft (rotor) and a flexible rubber housing (stator), and the delivery rate and pressures depend on the geometry of these parts. These durable worms have a robust design and are capable of conveying high-viscosity materials. e.g. S 5, SP 11, SP 25.

Piston pumps

Putzmeister double piston pumps operate with a high degree of reliability. The low-set agitator conveys concrete to the cylinder openings, and two changeover cylinders move the S transfer tube back and forth between the pressure and suction openings. Hard chrome plated delivery cylinders, spectacle wear plates made from hardened steel and the design of the S transfer tube system all guarantee a long service life. e.g. P 715, P 718, P 720, P 730.

Mechanical single piston pumps

A pump for extreme conditions. The material is conveyed from the trap mixer through the hopper to the intake opening, where the delivery piston draws it through the valve housing. Automatically controlled ball valves then operate to open the channel to the pressure outlet of the pump. The delivery pistons are driven by a cam disc and operate with a counter stroke, whereby one piston only offers a balancing function. e.g. P 13.

Mixer pumps

The hopper can be filled with bagged goods or premixed dry mortar via an air injection hood. The material enters the mixing pipe assisted by the agitator, and the water quantity can be adjusted accurately and added directly to the mortar in the mixing zone. The pump consists of a flexible rotor & stator system, e.g. MP 25.

## Solutions for conventional screed

Site mixes (water, aggregate, binder) with a maximum particle size of 16 mm are added to the mixing vessel and then conveyed to the discharge tripod by compressed air.

Semi-dry floor screed

## Solutions for self levelling floor screed

For flowing screeds produced at a screed or concrete plant, and then delivered direct to the construction site after the addition of a retarding admixture, a machine with either a worm pump or a piston pump can be used, depending on the distance, delivery rate/method and particle size (max. 16 mm).

We also offer economical solutions for self levelling floor screed in the form of premixed dry bags or site mixes with a maximum particle size of 4 to 8 mm.

Self levelling floor screed

## Solutions for standard and fine plaster

Putzmeister offers a wide range of mixing and pumping systems, primarily different versions of worm pump for processing premixed dry mortar with a maximum particle size of 3 to 8 mm.

Alternatively, we also offer a machine with a piston pump for pumpable site-made mixes containing aggregate (sand), lime or cement and water, which are manufactured in the mixer and applied with a spray gun.

Plaster/Fine plaster

## Solutions for shotcrete

Shotcrete is manufactured using a special process and conveyed from a truck mixer into the pump hopper. A special spray gun is then used for the technically complex application process. Accelerating admixture that reduces the retarding time of the concrete can be added according to the consistency, coating thickness, etc.

Shotcrete

## Solutions for fine grained concrete

Fine grained concrete is characterised by a maximum grain size of 32 mm. The premixed, wear-intensive material is added to the hopper on the machine, and can then be conveyed over long distances to the required placement site, usually by extremely robust, wear-resistant piston pumps.

Special applications

Maximum efficiency, maximum economic benefit – because only quality prevails

Made in Germany –  
delivering consistent quality

We believe that only quality prevails. We therefore rely on the **“Made in Germany”** quality standard. Most main/drive components are developed and manufactured by Putzmeister or originate from other renowned German manufacturers.

Developed, produced and tested  
by a single company

More than 120 employees at Putzmeister Mörtelmaschinen in Development, Production and Testing, work hand in hand to make your life easier. However, it is our customers and their individual challenges on construction sites that create a stimulus for improvement.

Putzmeister –  
at home on any construction site

India, Mumbai

Russia, Ryazan  
placement of ~100,000 m<sup>2</sup> of screed

Germany

Maldives, Vilufushi Island

Africa, Zambia, Lusaka

France, Bordeaux

Central Market Project in Abu Dhabi,  
Conveying screed in two stages to a  
height of 320 m

## Eco-friendly and durable – because sustainability is the best policy

### Generous power reserves and economical consumption

Putzmeister machines have more than enough power under the hood for every application. They are therefore rarely pushed to their limit. When idling, the motor automatically reduces its speed of rotation even further to save fuel and reduce wear.

### Durability maximised right down to the last detail

All materials and components have a maximum life and wear resistance limit. For example, the hood from our Mixokret machines is manufactured from high-strength, extremely impact-resistant plastic. All piston pumps are fitted with hard chrome plated cylinders as well as a spectacle wear plate made from tempered steel – just some of the many practical details.

### Less noise – less working stress

We keep noise levels to a minimum. Our engines are extremely quiet and operate efficiently, even at low speeds. They are also sound-insulated. The user-friendly exhaust air system also prevents the operator from being bothered unnecessarily during work.

### Material selected according to the application

Delivering fine plaster creates a whole new set of challenges for machine components compared to pumping sand or aggregate. At the same time, costs must remain transparent, in particular those of spare parts. Our machines are therefore fitted with components whose service life is designed for the specific application.

### Repairable design for outstanding value retention

Service and maintenance characteristics play an important role in the design of our machines, because the easier it is to access all components on the machine, the less time and money is invested to complete essential work and the longer it is worth repairing. We keep more than 12,000 items in stock should the worst come to the worst, and even spare parts for older models are available at short notice. Fortunately, there are more available than you think.

### On the safe side with Putzmeister

Our customers appreciate the fact that our machines are considered premium-class products in terms of quality, productivity and durability. You can also rest assured that our products comply with all currently applicable standards and Machinery Directives. Ultimately, it is a win-win situation in terms of safety for users who work with and around the machine as well as for owners because the investment is protected against possible damage.

■ Standard □ Option – Not available

- Semi-dry floor screed**
- Cement screed
  - Calcium sulphate screed (anhydrite)
  - Magnesia screed

- Special applications**
- Sand and aggregate
  - Lightweight concrete
  - Lean concrete up to 16 mm
  - Granulates

## Simple and economical

- Electric screed conveyors for use with an auxiliary compressor
- Auxiliary compressors are simply connected via the air port
- Screed conveyors are supplied with affordable power at the construction site
- Ideal for construction companies with compressors in their fleet
- Inexpensive to purchase, operate and maintain

## Flexible applications

- Different mixer vessel volumes allow for longer delivery intervals
- Flexible replacement of couplings or pressure connections possible depending on the application and hose required (ID 50, ID 65 or ID 90)
- The M 500 even processes coarse materials with a maximum particle size of 16 mm, making it possible to profitably complete smaller concreting jobs as well
- Powerful auxiliary compressors enable delivery ranges of up to 270 metres

## Durable, robust and safe

- Robust chassis enables easy manoeuvring on the construction site
- Integrated lifting eye facilitates safe transport with a crane
- Safety lock and protective grille on the cover for increased safety
- Reinforced, hot-dip galvanised hopper for greater robustness and durability

# Mixokret M 740 – Stage V

## Environmentally friendly and powerful

- Cement screed
- Calcium sulphate screed (anhydrite)
- Magnesia screed

**Powerful 36.4 kW Deutz engine with diesel particle filter** complies with “Stage V” emissions standard

**Feeder and scraper** for simpler filling and more efficient work

**New operating panel** with improved user-friendliness

**Fuel savings of up to 20 %** thanks to machine performance management (optional)

**Hydraulically powered mixer** with reverse rotation and overload protection

**Display unit under the hood** offers expanded functions and detailed service information

■ Standard □ Option – Not available

- Sand and aggregate

## Environmentally friendly and powerful

- Robust, compact 3-cylinder common-rail diesel engine from Deutz
- DVERT® particle filter system (DPF) enables maintenance-free operation in all possible applications and ambient conditions
- TRGS 554 conformity enables machine operation in (partially) enclosed areas
- Optional machine performance management enables fuel savings of up to 20% by adjusting the motor speed

## Robust and clearly laid out operating panel

- Intuitive keypad with “follow the blue light” principle increases operating safety
- All relevant functions are easy to switch on or off – even when wearing work gloves
- Coloured status LEDs on every keypad button provide continuous feedback on current operating states
- Resistant against all usually encountered weather conditions, fluids and chemicals
- Pressure gauge makes it possible to read the mixer and delivery pressure

## Machine display with extended range of functions

- Display unit with operating elements in the control box under the hood
- Setting values are saved after the machine is switched off
- Mix counter makes it possible to draw conclusions about the daily performance
- Service menu with comprehensive information enables quick diagnosis in case of faults and reduced downtime
- Reminder display for next due service

## Robust and durable

- Hydraulic mixer with reverse rotation and overload protection
- Hood made from special plastic in line with highest production standards with excellent robustness and resilience
- Durability and quality “Made in Germany” guarantee a high resale value

Special applications

- Sand and aggregate

## Made for working

- Air valve fitting, instruments and important indicators within view and easy reach
- Robust main switch (on/off, EMERGENCY STOP, pressure gauge) not covered to provide easier access
- Durability and quality “Made in Germany” guarantee a high resale value

## User-friendly exhaust air system

- Innovative user-friendly exhaust air system and larger exhaust air shaft
- Effective cooling of interior, compressor and motor reduces heat build-up

## Powerful drive unit

- Automatic motor speed control for greater economy and resistance to wear
- Consistent pumping characteristics that reduce stress on the machine
- Constant material flow and fewer impacts in the hose lines
- Increased operating temperature limit to 45 °C

## Additional equipment that makes work easier

- With the polystyrene kit, the compressed-air conveyors can be converted from traditional cement screed to polystyrene in just a few steps
- Precise metering of a previously set volume of water at the press of a button with the optional water metering

**Machine performance management** makes it possible to adjust the engine performance as required – with fuel savings of up to 20 %

**Feeder and scraper** for simpler filling and more efficient work

**Powerful 44.5 kW Deutz engine with diesel particle filter** complies with “Stage V” emissions standard

**New operating panel** with improved user-friendliness

**Hydraulically powered mixer** with reverse rotation and overload protection

**Display unit under the hood** offers expanded functions and detailed service information

■ Standard □ Option – Not available

- Sand and aggregate

### Environmentally friendly and powerful

- Robust, compact 3-cylinder common-rail diesel engine from Deutz
- DVERT® particle filter system (DPF) enables maintenance-free operation in all possible applications and ambient conditions
- TRGS 554 conformity enables machine operation in (partially) enclosed areas
- Machine performance management enables fuel savings of up to 20% by adjusting the motor speed

### Robust and clearly laid out operating panel

- Intuitive keypad with “follow the blue light” principle increases operating safety
- All relevant functions are easy to switch on or off – even when wearing work gloves
- Coloured status LEDs on every keypad button provide continuous feedback on current operating states
- Resistant against all usually encountered weather conditions, fluids and chemicals
- Pressure gauge makes it possible to read the mixer and delivery pressure

### Machine display with extended range of functions

- Display unit with operating elements in the control box under the hood
- Setting values are saved after the machine is switched off
- Mix counter makes it possible to draw conclusions about the daily performance
- Service menu with comprehensive information enables quick diagnosis in case of faults and reduced downtime
- Reminder display for next due service

### Robust and durable

- Hydraulic mixer with reverse rotation and overload protection
- Hood made from special plastic in line with highest production standards with excellent robustness and resilience
- Durability and quality “Made in Germany” guarantee a high resale value

Special applications

- Sand and aggregate

## Powerful

- Oil-cooled 4-cylinder Deutz diesel engine with efficient compressor for maximum pump output and reserve power for more challenging jobs
- Optimised compressor for consistent pumping characteristics, constant material flow and reduced impacts in the hose lines
- Flexible, low-maintenance hydraulic mixer drive

## Additional equipment that make work easier

- Air valve fitting, instruments and important indicators within view and easy reach
- Robust main switch (on/off, EMERGENCY STOP, pressure gauge) not covered
- Other instruments and displays protected safely under cover
- With the polystyrene kit, the compressed-air conveyors can be converted from traditional cement screed to polystyrene in just a few steps

## Effective cooling system

- Innovative exhaust air system and additional exhaust air shaft for improved cooling capacity and greater user-friendliness
- Effective cooling of interior, compressor and motor reduces heat build-up

## Modern, practical design

- Stronger hood shape and design for better value retention
- Reinforced, hot-dip galvanised hopper for greater robustness and durability
- Optimised maintenance and service features due to good accessibility
- Hydraulic feeder and scraper with improved radio system

Mixokret accessories

**Standard delivery line for Mixokret PM 50/ID 50 mm (max. grain size 8 mm\*)**

**Complete set, part no. 533 089**  
≈ 40 m long, consisting of:

Part	Part no.	Fig.
2× ID 50 mm hose, 10 bar, 20 m length	501 915	10
1× Discharge stand, 3 legs, aluminium ID 50	529 743	11
2× O-ring	010 207.000	13
6× Sponge ball, Ø 60 mm for delivery hose ID 50	000 212.005	14
1× Reducer piece ID 65, KKV 70 / ID 50	071 790.006	
2× Rectangular gasket	213 266.000	

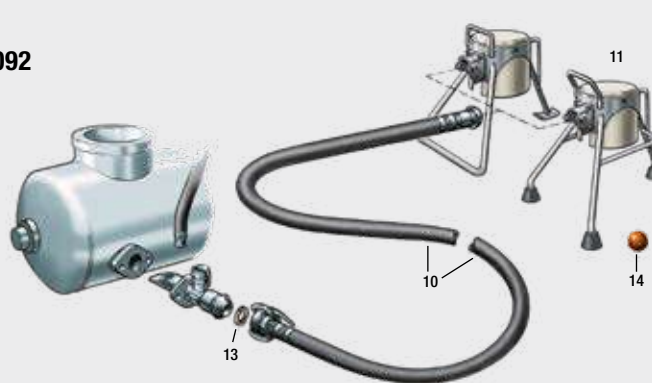

**Delivery line KK 70 for Mixokret ID 65 mm (grain size of up to 12 mm\*)**

**Complete set, part no. 533 092**  
≈ 80 m long, consisting of:

Part	Part no.	Fig.
8× ID 65 mm KK 70 hose, 10 bar, 10 m length	456 831	10
1× Discharge stand, 3 legs, aluminium KK 70	529 744	11
8× O-ring	010 207.000	13
8× Sponge ball, Ø 80 mm for delivery hose ID 65	000 246.000	14

**Delivery line KK 89 for Mixokret ID 65 mm (grain size of up to 12 mm\*)**

**Complete set, part no. 533 093**  
≈ 80 m long, consisting of:

Part	Part no.	Fig.
8× ID 65, KK 89 / HR hose, 10 bar, 10 m length	443 675	9
1× KKV 89 coupling	209 205.004	10
1× Discharge stand, 3 legs, aluminium KK 89	529 745	11
8× O-ring	002 224.004	13
8× Sponge ball, Ø 80 mm for delivery hose ID 65	000 246.000	14

**Delivery line KK 89 for Mixokret ID 90 mm (grain size of up to 16 mm\*)**

**Complete set, part no. 533 095**  
≈ 80 m long, consisting of:

Part	Part no.	Fig.
8× ID 90 mm KK 89 hose, 10 bar, 10 m length	455 436	10
1× Discharge stand, with runner, steel KK 89	529 748	12
8× O-ring	002 224.004	13
8× Sponge ball, Ø 120 mm for delivery hose ID 90	016 091.003	14
1× Special outlet cpl. ID 90, KKV 89	073 640.002	15

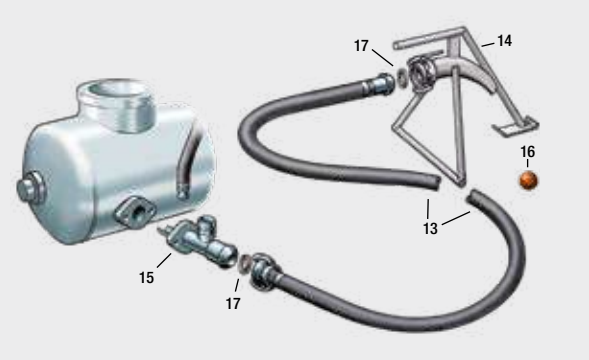

**Delivery line KK 108 for Mixokret ID 90 mm (grain size of < 32 mm\*)**

**Complete set, part no. 533 096**  
≈ 80 m long, consisting of:

Part	Part no.	Fig.
8× ID 90 mm KK 108 hose, 10 bar, 10 m length	454 406	13
1× Discharge stand, with runner, steel KK 108	209 811.003	14
1× Special outlet cpl. ID 90, KKV 108	419 634	15
8× Sponge ball, Ø 120 mm for delivery hose ID 90	016 091.003	16
8× O-ring	210 580.006	17

\* Depending on the material to be conveyed.

# S 5 EF

The compact, electric liquid screed pump

Vibrator with vibrating screen  
for constant material flow

- Cement floor screed
- Calcium sulphate screed (anhydrite)

Large hopper  
for large amount  
of material, easy  
to clean

Cardan shaft plugged  
for quick change of worm parts

Cable remote control, 60 m, with emergency stop	□

## Accessories for processing self levelling floor screed with S 5 EF

Complete set, part no. 533 123  
≈ 40 m long, consisting of:

Part	Part no.	Fig.	Optional accessories	Part no.
3× Delivery hose ID 50, V 50, M 50 13.3 m	501 914	1	1× PM grout, 18 l storage tank, 25 pcs	266 743.004
5× Sponge ball, Ø 60 mm	000 212.005	3		
5× Seal ring ID 50	213 266.000	2		

■ Standard □ Option – Not available

## Worm pump with powerful 7.5 kW drive

- Electrically powered worm pump with powerful constant drive
- Ideal for larger quantities of material such as required to convey self levelling floor screed

## Robust and economical

- Frame and hopper manufactured from robust steel components
- Hinged protective grille provides ample access for maintenance and cleaning
- Plug-in Cardan shaft enables the quick replacement of auger components without using tools
- Construction site chassis with pneumatic tyres

## User-friendly concept

- Easily detachable vibrating screen prevents material with an excessive grain size and foreign bodies from entering the pump
- Central position of all operating elements and control box with 32 A connection

## Equipment for conveying self levelling floor screed is provided on board

- Machine operated from the installation location using cable remote control supplied as standard
- Large 130 l hopper for rapid filling from truck mixer
- Vibrator ensures a continuous supply of material
- Mixing spirals on the Cardan shaft increase the homogeneity of the conveyed material

Technical data	S 5 EF
Part no.	111 635.090
Feed hopper	130 l
Pump	Worm pump 2L74
Delivery rate (theor.)*	90 l/min.
Delivery pressure (max.)	25 bar
Delivery range**	Up to 60 m horizontal, 40 m vertical
Engine	Electric, 7.5 kW, 400 V/50 Hz
Connection	32 A CEE; max. 100 m; min. 4 mm²
Fuse	25 A
Weight	260 kg
Length × width × height	2610 × 680 × 770 mm
Filling height	770 mm
Maximum particle size	8 mm
Pressure connection	M 50
Sound level L <sub>WA</sub> /L <sub>PA</sub>	89 dB / <85 dB(A)

\* The delivery rate depends on the pump model. The delivery rate can vary in accordance with the pump used.  
\*\* The data is based on experience and depends on the materials used.

# SP 11 THF – Stage V

Economic, simple, lightweight

- Calcium sulphate screed (anhydrite)
- Cement floor screed

See page 48 in the catalogue for a list of suggested accessories.

■ Standard □ Option – Not available

## Specialist for self levelling floor screed applications

- Continuous, convenient processing of self levelling floor screed
- Infinitely adjustable delivery rate using hydraulic pump control
- Unbraked and weighs less than 750 kg (no additional driving licence required) for simple transport

## Efficient diesel engine

- Mechanical 3-cylinder diesel engine from Kubota complies with the “Stage V” emissions standard
- Low operating and maintenance costs thanks to the engine’s efficiency and maintainability

## Large hopper for efficient operation

- Optimised grille and enhanced vibrator prevent material with an excessive grain size and foreign bodies from entering the pump and guarantee a continuous material flow, even when conveying screeds containing plastic or metal fibres
- Ideal for loading with truck mixer in self levelling floor screed applications
- Infinitely adjustable delivery rate

## User-friendly concept

- Simple machine operation directly on the operating panel or via radio remote control
- Good accessibility and integrated high-pressure cleaner for easy servicing, maintenance and cleaning
- Modern easy-care design with robust plastic hood

Technical data	SP 11 THF – Stage V
Part no.	111 626.700
Feed hopper	220 l
Pump	Worm pump 2L75
Delivery rate (theor.)*	0–15 m³/h (250 l/min)
Delivery pressure (max.)	20 bar
Delivery range**	Up to 80 m horizontal, 40 m vertical
Engine	3-cylinder Kubota Diesel, 18.5 kW at 3000 rpm (Stage V)
Weight	750 kg (max. axle load)
Length × width × height	3260 × 1420 × 1160 mm
Filling height	1000 mm
Maximum particle size	8 mm
Chassis	Unbraked, suitable for road use
Sound level L <sub>WA</sub> /L <sub>PA</sub>	104 dB / <85 dB(A)

\* The delivery rate depends on the pump model. The delivery rate can vary in accordance with the pump used.  
\*\* The data is based on experience and depends on the materials used.

# SP 20 GHF – Stage V

light and compact, for large liquid screed quantities

Large filling area  
with splash guard

Powerful 37 kW petrol engine  
Meets "Stage V" emission standard without particulate filter

High conveying rates  
with large screw sections  
up to type 2L8

Central control point  
Intuitive control and display

- Calcium sulphate screed (anhydrite)
- Cement floor screed

■ Standard □ Option – Not available

## Meets the high demands on the construction site

- Robust construction for maximum durability
- Large feed hopper with 160 l volume and feed rates up to 20 m³/h
- Powerful vibrator optimises material flow through the screen
- Low filling height simplifies final cleaning and feeding through the truck mixer

## Environmentally friendly and powerful

- Powerful 37 kW petrol engine
- Meets all requirements of the "Stage V" exhaust gas stage, which means that the pump can also be operated in all EU countries and Switzerland in the future without any problems.
- Large 45 l tank enables long operating times

## Robust and clear control panel

- Intuitive keypad with "follow the blue light" principle
- Easy operation of all relevant functions - even when wearing work gloves
- Display unit with clear presentation of all information, protected by scratch-resistant, replaceable special glass

## High flexibility

- Radio remote control enables adjustment of the delivery rate and switching the motor on and off
- Crane eye for easy and safe moving of the machine by crane
- Low weight (< 750 kg) enables transport without a trailer driving licence

Technical data	SP 20 GHF
Part no.	111 677.200
Feed hopper	160 l
Pump	Worm pump 2L8
Delivery rate (theor.)*	20 m³/h
Delivery pressure (max.)	20 bar
Delivery range**	150 – 200 m
Engine	4 cylinder Kubota; 37 kW at 3600 rpm (Stage V)
Weight	< 750 kg
Tank capacity	45 l
Length × width × height	3317 × 1530 × 1180 mm
Filling height	1180 mm
Maximum particle size	8 mm
Chassis	Unbraked, suitable for road use

\* The delivery rate depends on the pump model. The delivery rate can vary in accordance with the pump used.  
\*\* The data is based on experience and depends on the materials used.

# SP 25 DHF – Stage V

Robust and powerful, for large volumes of self levelling floor screed

Large filling area with slewable spray guard

Robust design with durable plastic cover according to the highest quality standard

High delivery rates with large worm parts up to type 2L8

Central operating position with intuitive keypad and clearly laid out display

Powerful 37 kW diesel engine with particle filter complies with “Stage V” emissions standard

- Calcium sulphate screed (anhydrite)
- Cement floor screed

Equipment	SP 25 DHF
Car coupling	■
Hand lever press with hose	■
Instruction manual and spare parts list	■
Lifting eye	■
Radio remote control with delivery rate adjustment + engine on/off	■
Screen grille with 15 mm mesh width (grille)	■
Support feet	■
Support wheel	■
Toolbox	■
Vibrator	■
High-pressure cleaner	□
Screw conveyor parts 2L8	□
Special canopy paint in RAL colours	□
Truck coupling	□
Working lights	□

See page 48 in the catalogue for a list of suggested accessories.

■ Standard □ Option – Not available

## Meets the highest requirements on construction sites

- Robust design for maximum durability – tried-and-tested in site use and on the test track
- Large feed hopper with a volume of 250 l, a larger filling area and a slewable spray guard
- Powerful vibrator optimises the material flow through the screen
- Low filling height facilitates final cleaning and loading by the truck mixer

## Environmentally friendly and powerful

- Powerful turbocharged diesel engine with 37 kW of drive power and a diesel particle filter
- Meets all requirements of the “Stage V” emissions level, meaning the pump can be operated in all EU countries and Switzerland now and in future without issues
- TRGS 554 conformity enables machine operation in (partially) enclosed areas

## Robust and clearly laid out operating panel

- Intuitive keypad with “follow the blue light” principle increases operating safety
- Simple operation of all relevant functions – even when wearing work gloves
- Display unit with clear layout of all information, protected by scratch-resistant, replaceable special glass
- Entire operating panel protected by folding cover

## High flexibility

- Radio remote control makes it possible to adjust the delivery rate and switch the motor on and off
- Storage compartment for radio and charger underneath the hood
- Lifting eye additionally enables the easy and safe transfer of the machine by crane
- Support feet attached to both sides of the material hopper ensure stability on the construction site

Technical data	SP 25 DHF
Part no.	111 674.200
Feed hopper	250 l
Pump	Worm pump 7515 Premium
Delivery rate (theor.)*	20 m³/h
Delivery pressure (max.)	35 bar
Delivery range**	150–200 m
Engine	3-cylinder Kubota, 37 kW at 2700 rpm (Stage V)
Weight	1050 kg (maximum axle load)
Tank capacity	40 l
Length × width × height	4280 × 1410 × 1300 mm
Filling height	730 mm
Maximum particle size	8 mm
Chassis	Braked, approved for road use
Sound level L <sub>WA</sub> /L <sub>PA</sub>	104 dB / >85 dB(A)

\* The delivery rate depends on the pump model. The delivery rate can vary in accordance with the pump used.  
\*\* The data is based on experience and depends on the materials used.

Plaster/Fine plaster

- Cementitious adhesive and reinforcement mortar
- Spray plaster
- Textured plaster
- Fine plaster
- Levelling compound

Special applications

- Fire protection mortar
- Wet mortar
- ETICS
- Joint and frame mortar with requirements for high mixing quality
- Injection and anchor mortar (pressurised or unpressurised)

## Large hopper

- Mixing, pumping and spraying from a single material hopper
- Good accessibility and therefore easy to clean and maintain

## User-friendly design

- Lightweight, compact and therefore easy to transport
- Central control box for entire electrical system is easy to access at all times
- Pressure connection with pressure gauge for connecting mortar hoses

## Convenient operation

- Two engine speed settings
- “Mix” or “Pump” function selected using the rotary switch
- Cable remote control for switching pump on/off supplied as standard

## Practical accessories for a range of applications

- Optional alternative rotors and stators for adapting to the required pressure, particle size, pumping distance and output
- Frame filling hose or device for sealing and filling openings and voids

Technical data	P 12
Part no.	111 469.060

■ Standard □ Option – Not available

Large mixing vessel (115 l)

- Saves time because less material has to be refilled
- Less washing out required
- Convenient to fill

Conical mixing pipe

- Conical mixing pipe for optimised material flow, fewer blockages, easy to clean
- Mixing pipe separated from mixer drum to allow easier metering
- Integrated water pressure booster pump provides the necessary water pressure and quantity to achieve the right mixing quality

Convenient design

- Can be dismantled into manageable assemblies without using tools and then transported easily
- Easy access to the flow meter
- Wedge closures that secure the stator eliminate the need for special tools to perform maintenance work and replace components

Added value for the construction site

- Integrated compressor with automatic pressure cut-out guarantees a safer working environment
- Convenient adjustment of water metering quantity
- Compressed-air remote control for convenient operation, irrespective of your current set-up site
- Extensive range of accessories for special customer-specific applications

2× Air hose, ½", 20 m	001 665.004	4
10× Sponge ball Ø 45 mm	065 044.001	6
10× Seal ID 35	213 725.004	5
3× Hose holder, leather	000 206.008	
1× Attachment collar for insulating plaster MP 25	212 325 007	7

## Accessories for processing cementitious adhesive, reinforcement mortar, structural plaster (low performance 12 or 6 l/ min)

Complete set, part no. 533 073  
≈ 20 m long, consisting of:

Part	Part no.	Fig.
1× Pump parts		
- Screw conveyor D4-½	214 402.009	1
- Screw conveyor barrel D4-½	214 403.008	1
1× Cementitious adhesive mixer shaft	214 571.008	2
1× Flow meter with range of 40-400 l/min	208 025.007	3
1× Insertion nozzle, diameter of 4.5 × 55 mm	400 728	4
2× Mortar hose ID 25-40, 10 m	207 804.009	5
1× Large fine plaster spraying machine with PM coupling and Geka air connection	529 733	8
1× Air hose, ½", 20 m	001 665.004	11
5× Sponge ball Ø 30 mm	000 239.004	9
5× Seal ID 25	207 764.000	10
3× Hose holder, leather	000 206.008	

Part	Part no.	Fig.
1× Adhesive gun ID 17 / M 25-40 with shut-off valve and electrical connector for remote control	408 422	6
1× Extension cable 20 m	211 506.005	7

\* Depending on the material to be conveyed.

# S 5 EV/EVTM

Universal worm pump for standard and special applications

Plaster/Fine plaster

- **Exterior plaster**  
(lime, lime cement and insulating plaster)
- **Interior plaster**  
(lime plaster)

Special applications

- Fire protection mortar
- Self-levelling compound
- ETICS
- Masonry, adhesive and refurbishing mortar
- Sealing slurry
- Injection and filling mortar
- Glass-fibre-reinforced concrete
- Rough finish plaster and adhesive bridges  
(by installing corresponding worm parts)

Equipment	S 5 EV	S 5 EVT M

■ Standard □ Option – Not available

## Electric worm pump – extraordinarily versatile

- Large material hopper (100 l) and perfectly adapted pan mixer (80 l) for rapid material processing
- Depending on the material and application, different worm parts can be used, enabling great flexibility across a wide range of applications
- Rotor is only plugged in, making it possible to quickly change the worm parts without tools on the construction site

## Simple and safe

- Control box is also a power distributor for attached devices such as a pan mixer or compressors
- Infinite adjustment of delivery rate using handy rotary wheel
- Cable remote control with EMERGENCY Stop for remote operation available as an option
- Simple connection with 32 A CEE cable

## Pan mixer for demanding mixes

- Intelligent positioning of mixing blade guarantees maximum mixing quality
- Pan mixer can be easily retrofitted as required (S 5 EV)
- Protective grilles are equipped with integrated safety switches and can be folded wide open for optimum accessibility during maintenance and cleaning

## Flexible configuration for a wide range of applications

- Varied range of accessories covers a large number of applications
- Precise metering of water with the optional water metering
- Mixer timer relay as an option enables a defined mixing time to be set, which is required for high-strength mortar

**Modification of pump type 2L6 in line with other pump types:**

**Conversion of S 5 EV with slide-on Cardan shaft (version from part no. 111 452.310, 111 452.330) to D4, D4½, D4¼, D5 short, D6, D8-2+ with the following parts:**

Part	Part no.
1× Cardan shaft (spiral)	525 378
2× Tie rod (l=300 mm, M 20)	011 145.006
1× Pressure connection	202 189.004

**Conversion of S 5 EV 2L6 to 1L6 with the following parts:**

Part	Part no.
1× 1L6 rotor	207 136.007
1× 1L6 stator	214 536.001
1× Clamp, cpl.	422 747
2× Tie rod (l=300 mm, M 20)	011 145.006

**Conversion of S 5 EV 2L6 to D5 with the following parts:**

Part	Part no.
1× Cardan shaft (spiral)	525 378
1× D5 rotor	070 351.006
1× D5 stator	070 352.005
1× Clamp, cpl.	206 848.008
2× Tie rod (l=410 mm, M 20)	467 156
1× Pressure connection	202 189.004

**Conversion of S 5 EV 2L6 to 2L54 with the following parts:**

Part	Part no.
1× Cardan shaft (spiral)	455 703
1× Rotor 2L54	211 739.005
1× Stator 2L54	523 235

You can find information on our range of rotors and stators in the accessories catalogue – you can also contact customer service.

# SP 11 LMR – Stage V

Convenient plastering made easy

Plaster/Fine plaster

- Exterior plaster (lime, lime cement and insulating plaster)
- Interior plaster (lime plaster)

Special applications

- Light masonry or fire protection mortar
- Filling and grouting work
- Concrete renovation

Equipment	SP 11 LMR

■ Standard □ Option – Not available

## The benchmark in user-friendly plastering

- Water metering pipe and sophisticated dust extraction system (dust is extracted and discharged via the exhaust system) in the mixer cover for efficient and convenient working progress
- Unique capacity for generous reserves when working on more ambitious projects
- Extremely effective mixer
- Lifting mixer with low filling height that mixes material continuously

## Powerful and convenient

- Low-noise, low-speed economical 3-cylinder Kubota diesel engine
- Powerful 2L6 worm pump with pressure connection to hose connection
- Fully hydraulic pump and mixer drive with infinitely adjustable output

## Highest quality and safety standards

- Double-walled hood provides effective sound insulation
- Axle load of less than 750 kg, can be transported without requiring an additional driving licence as it is unbraked
- Machine operation conforms with CE standards to protect the machine operator

## Genuine added value – made for working

- Independent of the power supply, flexible operation on the construction site
- Lightweight, hard-wearing plastic hood that is easy to clean and can withstand the toughest site conditions

Technical data	SP 11 LMR
Part no.	111 626.400
Mixing vessel	180 l
Feed hopper	220 l
Delivery rate (theor.)*	5–60 l/min
Delivery pressure (max.)	25 bar
Delivery range**	60 m horizontal and 40 m vertical for external/internal plaster
Compressor	2-cylinder, 400 l/min, 3.7 bar
Worm pump	2L6
Engine	3-cylinder Kubota Diesel, 16.3 kW at 2600 rpm (Stage V)
Weight	750 kg (maximum axle load)
Length × width × height	3260 × 1420 × 1160 mm
Filling height	800 mm
Maximum particle size	6 mm
Chassis	Unbraked, suitable for road use
Sound level L <sub>WA</sub> /L <sub>PA</sub>	104 dB / >85 dB(A)

\* The delivery rate depends on the pump model. The delivery rate can vary in accordance with the pump used.  
\*\* The data is based on experience and depends on the materials used.

# SP 25 DQR – Stage V

Maximum performance for a variety of applications

Plaster/Fine plaster

- Exterior plaster (lime, lime cement and insulating plaster)
- Interior plaster (lime plaster)

Special applications

- Light masonry or fire protection mortar
- Filling and grouting work
- Concrete renovation

■ Standard □ Option – Not available

## Meets the highest requirements on construction sites

- Powerful worm pump with mixer for traditional internal and external plaster applications and a wide variety of other special applications
- Increased efficiency for higher throughputs, longer delivery ranges and higher delivery pressures
- Robust design for maximum durability – tried-and-tested in site use and on the test track

## Environmentally friendly and powerful

- Powerful diesel engine with 28 kW of drive power and a diesel particle filter
- Meets all requirements of the “Stage V” emissions level, meaning the pump can be operated in all EU countries and Switzerland now and in future without issues
- TRGS 554 conformity enables machine operation in (partially) enclosed areas
- Large tank with a volume of 40 litres for maximum running capacity without refuelling

## Robust and clearly laid out operating panel

- Intuitive keypad with “follow the blue light” principle increases operating safety
- Simple operation of all relevant functions – even when wearing work gloves
- Display unit with clear layout of all information, protected by scratch-resistant, replaceable special glass
- Entire operating panel protected by folding cover

## Powerful lifting mixer with large capacity

- Large lifting mixer with a volume of 240 l allows mixing of larger material quantities/containers
- Multi-component materials and premixed dry mortar can be mixed together on the construction site in the powerful mixer for any mixing time
- The lifting function of the mixer allows for a lower filling height and permits the simple transfer of the mixed batch to the feed hopper

Technical data	SP 25 DQR
Part no.	111 674.100
Mixing vessel	240 l
Feed hopper	250 l
Delivery rate (theor.)*	0.3–4.5 m³/h (2L6), optionally up to 15 m³/h (2L75)
Delivery pressure (max.)	35 bar, optional: 20 bar
Delivery range**	70 m horizontal and 50 m vertical for external/internal plaster
Compressor	2-cylinder, 400 l/min, 7 bar
Pump	Worm pump 2L6, optional: 2L75, 2L54, 2L74, 3L7
Engine	3-cylinder Kubota Diesel, 28 kW (Stage V)
Weight (fully refuelled)	1050 kg
Length × width × height	4280 × 1410 × 1480 mm (with mixer up)
Filling height	770 mm
Maximum particle size	6 mm (2L6), 8 mm (2L75)
Chassis	Braked, approved for road use
Sound level L <sub>WA</sub> /L <sub>PA</sub>	104 dB / <85 dB(A)

\* The delivery rate depends on the pump model. The delivery rate can vary in accordance with the pump used.  
\*\* The data is based on experience and depends on the materials used.

Accessories SP 11 / SP 25

Accessories for processing monocouche renders

Complete set, part no. 401 133  
≈ 30 m long, consisting of:

P 13

Robust and service-friendly for the most challenging site mixes in the world

Large mixer 170 l for excellent mixing quality

Engine, compressor and gearbox are very good protected

Robust, powerful piston pump (KA 230) for even pumpable sand

Delivery performance regulated mechanically over 3 settings

Equipment	P 13
Cleaning accessories	■
Grease cartridge	■
Hand lever press with hose	■
Instruction manual and spare parts list	■
Pneumatic remote control	■
Pressure gauge with T connection	■

Water supply fitting	□

Plaster/Fine plaster

- **Site mixes** (lime-gypsum, lime cement plaster)
- **Interior and exterior plaster** (coloured, cement and lime cement plaster, scratch plasters)

Shotcrete

- **Shotcreting, max. grain size 8 mm**

Fine grained concrete

- **Fine grained concrete, max. grain size 8 mm**

Special applications

- Grouting, filling, masonry and cement mortar
- Bentonite slurry
- Pumpable sand (e.g. crushed sand, dune sand, washed river or lake sand, desert sand, etc.) with max. grain size of 8 mm
- Self levelling floor screed

Powerful piston pump that can convey the most challenging materials

- Extremely hard-wearing single-piston pump KA 230 can even process sand with a particle distribution of 10 mm
- KA 139 and KA 230 can be fitted with pump heads of different sizes, depending on the material quality
- Robust plate hood protects the motor, compressor and gearbox

Two powerful mechanical drive variants – electric or diesel

- DMR version with air-cooled two-cylinder diesel engine (14.5 kW) – reliable and robust, braked or with construction site chassis
- EMR version with 400 V electric motor (7.5 kW) – particularly quiet, maintenance-free operation

Efficient mixer/hopper unit

- Large mixer with discharge flap achieves an excellent mixing quality
- Mechanically driven vibrating screen separates material with an excessive particle size and foreign bodies
- Additional agitator in the mortar hopper prevents the material from settling
- Cleaning port inside the hopper for quick and easy cleaning

Extremely durable, practical design

- Built for the most challenging site-made mixes in the world
- Good accessibility – service and maintenance-friendly
- Output can be regulated mechanically (three stages)
- Wear-resistant components such as hard chrome plated cylinders reduce operating costs

# P 715

Reliable, powerful and mobile for a wide range of applications

**Maintance and service-friendly**  
everything is protected below the canopy

**Operating panel**  
ergonomical on one side

**Large hopper 280 l**  
with rubber collar and protective grid

**Supporting feet**  
for secure stability

**Extremely robust piston pump unit**

Machine operation with the diesel engine only permitted outside the EU!

■ Standard □ Option – Not available

- Calcium sulphate screed
- Cement floor screed

- Shotcrete

- Conveying fine grained concrete
- Grouting work

## Uncompromising versatility

- Processing self levelling floor screed, fine grained concrete and shotcrete with a maximum particle size of 16 mm
- The delivery pressure can be adjusted to 40 or 68 bar using a hand lever, depending on the material and delivery line
- Lightweight, roadworthy T-chassis (trailer version) and sturdy lifting eye for easy transport and effortless manoeuvring

## Powerful drive

- Reliable oil-cooled 3-cylinder Deutz diesel engine complies with exhaust emission regulation III A
- Abundant power, even at lower speeds – preserves the aggregate and saves on fuel

## High-quality processing for greater working efficiency

- Operating and control elements are ergonomically and logically positioned on one side
- Lightweight plastic hood with smooth painted finish, stainless and easy to clean
- Bodyshell with CDP dip coating reliably protects against rust
- Hopper folds to the side to give access to the agitator

## Low-wearing, versatile piston pump

- Hard chrome plated cylinders, spectacle wear plate made from tempered steel, self-sealing self-adjusting ring and S transfer tube minimise wear
- Deep-seated agitator ensures homogeneous mixing quality
- Reliable hydraulic control for greater efficiency

■ Standard □ Option – Not available

## Economic and future-oriented

- Processing self levelling floor screed, fine grained concrete and shotcrete with a maximum particle size of 16 mm
- Delivery pressure can be reduced to 40 bar with the hand lever, making it possible to use lighter mortar hoses
- Low weight, suitable for road use and lifting eye for maximum flexibility
- Folding hopper makes cleaning and maintenance easier

## Environmentally friendly and powerful

- Robust, compact 3-cylinder common-rail diesel engine from Deutz
- DVERT® particle filter system (DPF) enables maintenance-free operation in all possible applications and ambient conditions
- TRGS 554 conformity enables machine operation in (partially) enclosed areas
- Does not require urea (also known as AdBlue®)

## Robust and clearly laid out operating panel

- Intuitive keypad with “follow the blue light” principle increases operating safety
- All relevant functions are easy to switch on or off – even when wearing gloves
- Coloured status LEDs on every keypad button provide continuous feedback on current operating states
- Lockable acrylic-glass door protects against dirt, moisture and unauthorised access and is resistant against weathering

## Incredible versatility thanks to wide range of equipment

- More equipment included as standard, with stroke counter and electric adjustable delivery rate
- EOC perfectly adjusts the motor speed to the required delivery rate. This makes it possible to save up to 15% in fuel.
- Air vessel reduces pumping vibrations for high-viscosity mortars
- Synchronised additive pump fully integrated in control system

# P 718

Compact, wear-resistant powerhouse for heavy-duty applications up to 32 mm grain size

Machine operation with the diesel engine only permitted outside the EU!

Maintance and service-friendly everything is protected below the canopy

Chassis for road use

Supporting feet for secure stability

Large hopper 360 l with rubber collar and protective grid

Piston pump unit extremely robust

Operating panel ergonomical on one side

Equipment	P 718
Clamp coupling with seal, 4.5"	■
Cleaning accessories	■
Instruction manual and spare parts list	■
Lifting eye	■
Protective grille	■
Rubber collar	■
Safety helmet	■

Special canopy paint in RAL colours	□
Stroke counter	□
Working lights	□

■ Standard □ Option – Not available

## Sufficient power for coarse materials (32 mm particle size)

- Also suitable for conveying self levelling floor screed and shotcrete
- 70 bar pressure at low speed – preserves the aggregate and saves fuel
- Large hopper with capacity of 360 l
- Reliable hydraulic control for greater efficiency

## Minimal operating and maintenance costs

- Lightweight painted plastic hood and bodyshell with CDP dip coating do not rust and are easy to clean
- Optimum access for cleaning, maintenance and service work such as checking the oil level

## Simple, clearly laid out, user-friendly

- Operating and control elements are ergonomically positioned within easy reach and visual range on one side
- Hopper folds to the side to give access to the agitator
- Lightweight, roadworthy T-chassis (trailer version) and sturdy lifting eye for easy transport and effortless manoeuvring

## Wear-resistant, durable double-piston pump

- Hard chrome plated cylinders
- Spectacle wear plate made from tempered steel
- Self-sealing self-adjusting ring
- Geometry of the S transfer tube adapted to coarse materials

Technical data	P 718 TD – Non-EU	P 718 SD – Non-EU
Part no.	111 514.400	111 514.XXX depending on the machine configuration
Feed hopper	300 l/360 l (with rubber attachment collar)	
Delivery rate (theor.)*	4–17.4 m³/h	4–17.4 m³/h
Delivery pressure	68 bar	68 bar
Delivery range**	Up to 300 m horizontal and 100 m vertical, with shotcrete up to 100 m horizontal and 80 m vertical	
Piston pump	2-cylinder, hydraulic	
Cylinder diameter	150 mm	150 mm
Engine	3-cylinder Deutz Diesel, 34.5 kW (emission stage III A – non-EU)	
Drive cylinder diameter	80/45 mm	80/45 mm
Piston stroke	700 mm	700 mm
Strokes/min.	27	27
Weight	2320 kg	2000 kg
Length × width × height	4644 × 1560 × 1790 mm	3025 × 1460 × 1600 mm
Filling height	1180 mm	1120 mm
Maximum particle size	32 mm	32 mm
Machine model	Trailer concrete pump	Stationary pump
Chassis	Road travel chassis, 2500 kg	Skid frame
Sound level L <sub>WA</sub> /L <sub>PA</sub>	108 dB / >85 dB(A)	108 dB / >85 dB(A)

\* The delivery rate depends on the pump model. The delivery rate can vary in accordance with the pump used.  
\*\* The data is based on experience and depends on the materials used.

Shotcrete

### ■ Shotcrete

Fine grained concrete

### ■ Concrete, max. 32 mm grain size

# P 730 – Stage V

The most powerful compact pump for high delivery rates in a new design

Extra large hopper with a volume of 360 l and agitator

Central operating position with intuitive keypad and clearly laid out display

Roadworthy chassis

Powerful 55.4 kW diesel engine with particle filter complies with “Stage V” emissions standard

Robust design with durable plastic hood according to the highest quality standard

New piston pump unit for particle sizes of up to 32 mm with delivery cylinders that are 180 mm in diameter for even higher delivery rates

Shotcrete

Concrete, max. 32 mm grain size

■ Standard □ Option – Not available

## Economic and future-oriented

- Ideal for pumping service providers and construction companies, compact and flexible in use
- Delivery pressure can be reduced to 40 bar with the hand lever, making it possible to use lighter mortar hoses
- Suitable for road use and lifting eye for maximum flexibility
- Folding hopper makes cleaning and maintenance easier

## Environmentally friendly and powerful

- Robust, compact 3-cylinder common-rail diesel engine from Deutz
- DVERT® particle filter system (DPF) enables maintenance-free operation in all possible applications and ambient conditions
- TRGS 554 conformity enables machine operation in (partially) enclosed areas
- Does not require urea (also known as AdBlue®)

## Robust and clearly laid out operating panel

- Intuitive keypad with “follow the blue light” principle increases operating safety
- All relevant functions are easy to switch on or off – even when wearing gloves
- Coloured status LEDs on every keypad button provide continuous feedback on current operating states
- Lockable acrylic-glass door protects against dirt, moisture and unauthorised access and is resistant against weathering

## Incredible versatility thanks to wide range of equipment

- More equipment included as standard, with stroke counter and electric adjustable delivery rate
- EOC perfectly adjusts the motor speed to the required delivery rate. This makes it possible to save up to 15% in fuel.
- Synchronised additive pump fully integrated in control system
- Robust radio and cable remote control with a wide range of operating options

Find your nearest Putzmeister dealer here  
**[www.pmmortar.com](http://www.pmmortar.com)**

The maximum availability of your machine must be guaranteed. Our reliable service team will be glad to help if the worst comes to the worst. To make sure you are not kept waiting, we work with a large network of competent service partners located all over the world.

### Fast delivery of original spare parts

We have a large warehouse at our main plant in Aichtal and our service support points, where we stock all our spare and wear parts. Consequently, we can deliver all the parts you need at the drop of a hat. The same applies for our quality accessories. We always keep the most common parts from our extensive assortment in stock.

Our electronic spare part catalogue provides a comprehensive overview of all parts. Simply enter your machine number or part number to display the relevant spare parts. Click on the “Service” menu item on our homepage at [www.pmmortar.de](http://www.pmmortar.de) for more information.

## Work more efficiently with Putzmeister training courses

Gather first-hand information in the Putzmeister academy and share practical knowledge that can be applied to your daily working routine.

### We offer you

- Technical training on the design characteristics and functions of the machine
- User training on handling and economical operation of Putzmeister machines
- Individual seminars held at your own company
- Special seminars for sales partners that discuss current sales information
- State-of-the-art facilities for staff and customer training
- Trainers with extensive practical experience
- Interesting, easily comprehensible transfer of knowledge
- Detailed training documentation

### Advantages

- Save time and money – rectify minor faults and perform simple maintenance tasks independently
- Correct machine operation for greater working efficiency
- Prevent incorrect operation – increase availability
